AMENDMENT UNDER 37 C.F.R. § 1.114(c) Attorney Docket No.: Q95279

U.S. Application No.: 10/581,911

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the

application:

LISTING OF CLAIMS:

1. (currently amended): A method for engineering making cartilage tissue which

comprises:

by two-dimensionally culturing bone marrow mesenchymal cells to confluence and

subculturing the cells, three-dimensionally culturing bone marrow mesenchymal the cells in a

simulated microgravity environment with the use of a uniaxial rotary bioreactor that realizes a

simulated microgravity environment on the earth by compensating the ground gravity

with the stress resulting from controlled rotation speed, and obtaining cartilage tissue expressing

Type II collagen.

2. (original): The method according to claim 1, wherein the simulated microgravity

environment provides gravity that is 1/10 to 1/100 of the ground gravity to an object on a time-

average basis.

3. (currently amended): The method according to claim 1, wherein the simulated

microgravity environment provides gravity that is 1/10 to 1/100 of the ground gravity to an

object is attained with the use of a bioreactor that realizes a simulated microgravity environment

on the earth by compensating the ground gravity with the stress resulting from controlled

rotation speed.

2

AMENDMENT UNDER 37 C.F.R. § 1.114(c)

U.S. Application No.: 10/581,911

4. (canceled).

5. (currently amended): The method according to claim [[4]]1, wherein the bioreactor that realizes a simulated microgravity environment on the ground is a Rotating Wall Vessel (RWV) bioreactor.

Attorney Docket No.: Q95279

- 6. (previously presented): The method according to claim 5, wherein culture is conducted by seeding bone marrow cells at a density of 10⁶ to 10⁷ cells/cm³ at a rotation speed of 8.5 to 25 rpm when a 5 cm in diameter RWV vessel is used.
- 7. (previously presented): The method according to claim 1, wherein culture is conducted by adding TGF- β and/or dexamethasone to a culture medium.
 - 8. (canceled).
- 9. (currently amended): The method according to claim 1, wherein the bone marrow mesenchymal cells are isolated from a subject in need of transplantation of the engineered cartilage tissue.

AMENDMENT UNDER 37 C.F.R. § 1.114(c)

U.S. Application No.: 10/581,911

Attorney Docket No.: Q95279

10. (new): The method according to claim 1, wherein the cartilage tissue has a major

axis of 1 cm or more.

11. (new): The method according to claim 1, wherein the rotation speed is adjusted

to synchronize with the sinking speed of the seeded cells to minimize the influence of the ground

gravity on the cells.
